

Summer 2018 Wildlife Learning series:

# ECHOES & HOWLS:

## SOUNDS THAT EXPAND THE LAND!

Learn about animals that know how to make themselves heard!  
"Echoes & Howls" examine the anatomy that allow these animals to make NOISE and communicate with others. Animal exhibits plan to include our newest baby Red Fox, Harris Hawk, Straw-colored Fruit bat, our popular White-nosed Coati mundi, and a few other friends.

# Snorts Screeeech!

## SLITHERS and

This program offers a comparison on how a variety of animals: reptiles, birds, mammals even insects(!) —all uniquely create their own sound. Wildlife exhibits plan to include our popular Yellow-naped Green Amazon parrot, new baby Raccoon, South American Tegu, African Hedgehog and some other creatures!

# CROW, CHIRP & BRAAAA-AY

Bringing back some of our most popular and more "hands-on" exhibits, this program geared (but not limited) for younger audiences will explore up close how these animals make their own music and the importance in their own social network. Exhibits plan to include our newest baby Pygmy Goat, Silkie Chicken, Angora Rabbit, Prairie Dogs and also some new additions confirmed later this Spring.

**Natural History Education Company of the MidSouth**

**Thursday July 5**

**2 pm**

**Cumberland Meeting Room**

There will be live animals featured at this program.

Children must be accompanied by a Parent/Caregiver.
